CORE EXPERTISE

- Production Supervision
Daily planning, work allocation, material readiness, job-order follow-up, dispatch & cross-department coordination
- CNC & Fabrication
Fiber laser & plasma cutting, cutting-program preparation, machine calibration, canopy assembly, joint welding, powder coating
- CAD & Quality
AutoCAD 2D/3D, blueprint reading, QC, ISO 9001, incident logs, toolbox talks
- Data & AI
Excel, Power BI, AI automation, prompt engineering, inventory tracking, network troubleshooting

MACHINES

- Fiber Laser · CypCut/Bochu
- Plasma · Hypertherm 125
- HyperCAD / Hypernest
- Press Brake · Cybelec
- Delem DA-66T
- Euromac MTX FLEX 6
- Shearing

CERTIFICATIONS

- AutoCAD 2D & 3D — Rolla Institute
- CCNA — Cisco Networking
- CCST — Cisco Support Technician
- Certified Ethical Hacker (CEH)
- ISO 9001 Quality Management (Training)
- Business Intelligence & Data (Training)
- AI Automation & Prompt Engineering

PROFESSIONAL SUMMARY

Production Supervisor with **11+ years of UAE experience** in generator and canopy manufacturing. Directly supervises an **18-person CNC and machine-operations team** and coordinates daily with **7 section foremen** across fabrication and finishing — a combined span of **45+ personnel** — managing each job from client drawing and cutting program through material readiness, quality control and dispatch. Proven at restoring halted production and substituting materials without losing output, and at building practical digital tools that protect continuity, including an **AI quotation system that cut turnaround by 97%**. Founder & CEO of Convergent AI Systems, building AI automation for the fabrication sector.

WORK EXPERIENCE

CNC Laser & Plasma Machine Operations In-Charge 2015 – Present

Ultimate Power Solution Groups · SAIF Zone, Sharjah, UAE

- Supervise an **18-person CNC team** (laser, plasma, punching, bending, shearing) and coordinate daily with **7 section foremen** across welding, powder coating, painting, mechanical, fabrication, silencer and electrical.
- Manage production from client drawing and programming through material readiness, QC and dispatch — handling **5+ job orders per day** across mixed-KVA generator and canopy specifications.
- Restored a stopped fiber laser during a **500+ unit generator order** through a ~10-day vendor-support gap — traced the fault to an internal display cable, bypassed it externally and resumed output without the vendor; **recognised by the CEO with a bonus**.
- Maintained continuity through a material QC rejection by revising cutting drawings from 1220×2440 mm to **1220×3000 mm (3 mm sheet)**, avoiding downtime across multiple active orders.
- Built an **AI quotation system** that cut quotation time from 30 minutes to 60 seconds (**97%**); now in daily use by sales.
- Built the **UPS Production Command Centre** — live job tracking across production departments with an AI-written daily production summary.
- May 2026 floor results:** 96% output against plan, zero lost-time injuries, 63 people and 13 registered CNC machines at SAIF Zone.
- Prepared and reviewed 2D/3D CAD drawings and CNC cutting programs; maintain operational documentation, incident logs and safety records.

Founder & CEO — Convergent AI Systems (CAS) 2025 – Present

AI Automation Software · Free-Zone licensed June 2026 · UAE & GCC

- AI Quotation Generator** — fabrication quotes in 60 seconds instead of 30 minutes, using the company's own pricing data and approval rules. Live and used daily.
- Metal Steel Hub** — instant steel fabrication quotes with margin control and PDF export.
- SteelTrack** — sheet-metal ledger that follows material from arrival, through cutting, to scrap, so stock and waste are always known.

IT Technician Assistant 2012 – 2014

BCT Limited · Lagos, Nigeria

- Fixed hardware and software faults across desktop and networked systems; provided end-user support and basic training.

Assistant Mechanic 2009 – 2012

SICO Mechanical Engineering Workshop · Ondo, Nigeria

- Diagnosed mechanical faults and carried out routine maintenance on workshop equipment; assisted senior mechanics on complex repairs.

EDUCATION

Higher International Diploma in Mechanical Engineering (UK Level 5)

ASTI Academy, Dubai — **In progress, expected 2027**

Higher Education Diploma, Agricultural Science Education (NCE)

College of Education, Ikere-Ekiti, Nigeria

SELF-AUTHORED TRAINING MANUALS

Production Supervisor Mastery Manual — 30-day program on safety, production flow, material control, downtime, shift handover, KPIs and reporting · **Production Analysis Guide** — output, cycle-time, utilisation and scrap control · **ISO 9001 Internal Auditor Guide** — 15-day practical audit program. *Portfolio available on request.*
